Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helenick (U.S. 6,141,801) in view of Fabry (U.S. 5,345,609). Helenick teaches a glove having a first and second half, the first and second half having a plurality of openings having a viscous material (gel). Helenick further teaches that different gels may be utilized including those that have liquid character (col. 10, lines 18-68). Helenick teaches the claimed invention except for attaching means to attach the first half of the glove to the second half. Fabry teaches a glove having a first and second half with a plurality of cells, and further teaches a hook and loop fastener system to attach the first half of the glove to the second half of the glove. It would have been obvious to one having ordinary skill in the art at the time of invention to provide hook and loop attaching means as taught by Fabry to the glove of Helenick in order to allow a user to better secure or tighten the first and second glove halves about the hand of a user. Regarding claim 2, Helenick as modified by Fabry above fails to teach the use of viscous clay. Absent disclosure as to the criticality of the claimed material, the specific material chosen would have been obvious to one having ordinary skill in the art at the time of

invention as the skilled artisan would select a material based on its suitability for intended use absent unexpected or undesired results. *In re Leshin*, 125 USPQ 416.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
